

## Power Steering Nano Protect

### Product Description:

Formulated with advanced Nano-technology, Power Steering Nano Protect creates a highly effective anti-friction film throughout your power steering system. It protects the surfaces of power steering components against wear and tear. Use Power Steering Nano Protect to:

- Lubricate and protect your vehicle's power steering system
- Reduce wear and tear on steering components
- Eliminate unpleasant "rattling" noises as well as "stiffness" in the power steering

***Use in all cars with power steering.***

### Directions for Use:

**Use as needed** to quieten noisy steering, or when changing the power steering fluid in your vehicle.

1. Ensure the car engine is OFF.
2. Locate the power steering fluid reservoir.
3. Remove 3 ounces (approximately 100ml) of the power steering fluid from the reservoir.
4. Add PS Nano Protect to your power steering fluid reservoir; replace lid on reservoir and enjoy safer, smoother power steering.

### Technical Specifications:

**Application Fields:** Power steering system and differentials

**Reaction Time:** Works during regular automobile operation

**Consumption:** 100 ml treats up to 2 liters of power steering fluid

**Frost susceptibility:** No

**Available Container Size:** 100 ml

**Part Number:** 43228
